

**BASCD Spring
Scientific Meeting 2025**

What I learned about...

Thursday 19th - Friday 20th June 2025
Cardiff University

Welcome

Hindsight, they say is a wonderful thing. And yet, how often do we see the wheel being reinvented, wise counsel not being sought or listened to? The theme of this year's spring meeting and scientific conference is:

“What I learned about ...”

I have invited a prestigious and experienced line-up of academic colleagues and collaborators, senior leaders and dental public health practitioners to share with us their insights into what they have learned, what they know now that they wish they had known before and what they would do differently if they were starting again.

If you feel that your professional practise would benefit from such wisdom, then it is my great pleasure to invite you to the 2025 spring meeting and Scientific Conference in Cardiff, the wonderful city that is the capital of Wales.

The meeting will be held in the Centre for Student Life, our new study hub, located on the main Cardiff University Campus, ten minutes walk from the City Centre. We have arranged overnight accommodation in the Indigo Hotel and the Conference Dinner will be held in Aberdare Hall. All are within 10 minutes walk of each other.

In addition to the formal oral presentations, we will have the usual opportunity for the dissemination of work of relevance to dental public health and community dentistry in the form of posters. Formal registration for the conference, will open mid-January and the closing date for entry of posters and for the prize competitions will be 31st March 2025.

The sun always shines in Cardiff in June and this conference is the perfect opportunity to get away from your computer screens, away from on-line meetings and meet colleagues old and new in “real-life”.

Professor Ivor Chestnutt
BASCD President-Elect

Aims:

The conference will see experienced colleagues expand on their area of expertise and what they have learned that would be useful to others doing similar work.

Objectives:

To explore and expand knowledge on:

- Influencing without power
- Facilitating change in primary medical care
- Being the Children's Commissioner
- Doing research in care homes
- Obtaining electronic consent for school toothbrushing
- Re-establishing health improvement initiatives post-pandemic
- Clinical risk assessment in primary care
- The use of antibiotics in primary care
- Advancing minimally invasive dentistry

Learning content:

The conference will see experienced colleagues expand on their area of expertise and what they have learned that would be useful to others doing similar work.

Development outcomes:

This ECPD event meets the criteria for the General Dental Council's development outcomes **A, B, C and D**.
